

Anandu G

Computer Science Student (AI & ML)

9747055371 | anandhuabhi12@gmail.com | linkedin.com/in/anandu

CAREER OBJECTIVE:

Motivated Computer Science student specializing in Artificial Intelligence and Machine Learning, seeking opportunities to apply theoretical knowledge in real-world applications. Eager to develop expertise in software development, AI systems, and analytical problem-solving while contributing to innovative projects.

EDUCATION:

BTech in Computer Science (AI & ML) | Expected Graduation: 2026

Sree Chitra Thirunal College of Engineering,
Thiruvananthapuram

Relevant Coursework: Machine Learning, Data Structures, Algorithms, Artificial Intelligence, Database Management Systems, Object-Oriented Programming

PROJECTS:

AI Parking Detection System

Personal Project | 2024

Built an AI-based system for automated parking space detection and management.
Implemented computer vision algorithms for real-time vehicle detection and tracking.
Utilized Python and machine learning libraries for image processing and analysis.

TECHNICAL SKILLS:

Programming Languages: Python, C, Java

Web Development: HTML, CSS, JavaScript

AI/ML & TOOLS:

AI/ML: Machine Learning basics, Data Analysis, Computer Vision

Tools: Git, VS Code, Google Colab, Jupyter Notebook

Database: MySQL, MongoDB
